Why should resellers offer PBXtended?

PBXTENDED®

A service designed with the resellers in mind.

The PBXtended program was designed with the reseller in mind. Like all of our products, it will only be offered through our reseller channel and will not be sold directly to customers by Schmooze Com, Inc. It is designed to allow you receive monthly residual income along with a bonus payment for selling the solution!

What is the big difference between PBXtended & PBXact?

PBXtended uses the same technology and feature set of the PBXact system. This includes XactView, XactDialer, QXact and all the phone side apps. The only real difference is the PBX is hosted in our datacenters to offer the best uptime possible.

Unlike other hosted PBX's you have the option of including new phones in the monthly cost, customers can also purchase phones outright, or choose to use their existing approved SIP phones.

Each per seat user includes their own local DID and unlimited calling to the US. Additional DID's, Toll Free Numbers and international calling can be purchased.

So how do I make money as a reseller?

Resellers make money as follows:

$ Charging for installation and training

$ 15% commission on monthly recurring charges

$ Receiving a 90 day satisfaction bonus equal to one month's billing**

Contact your account manager for more information on how to start offering PBXtended to your clients.

** 90 Day Satisfaction Bonus is awarded to resellers with customers who keep the service for a minimum of 90 days. The bonus is equal to one full month's billing cycle for that customer.

* Note: The PBXtended system requires an internet connect with at least 768kbps up and down and 80kbps per use
