Schmooze Com Inc.

The Services application allows you to go to all applications that have been created for your phone model number without having to setup a dedicated button for this that might not be used often. Think of it as an app store that lets you access applications that you don't want to use often.

Pressing the Services button should give you a screen like below.

You can now use the up/down arrow keys to go through the whole list of apps and press the right arrow key to access the highlighted application. Press the Exit button to return to the phones main screen.
