The Night Mode button allows you to toggle any Day/Night toggles that you have setup on your system. The red light next to the button will also be red anytime one or more of your toggles are in night mode.

Pressing the Night Mode button will display a screen similar to below

You will see a screen with all of your Day/Night toggles that are setup on your system and what mode each day/night is currently in. We get the following options

- **Toggle**- Pressing this option will toggle the specific day/night option that you have highlighted on your phone. Use your up/down key to highlight a different day/night option
- **ALL DAY**- Pressing this will toggle all of your day/night modes to Day
- **ALL NIGHT**- Pressing this will toggle all of your day/night modes to Night
- **Exit**- Press this to leave the Day/Night Application and return to the main phone screen

We will toggle our Main Day/Night to night mode now by highlighting the Main option with our up/down key

Press the toggle button and we will now see the the Main day/night is in Night mode.

We will toggle our Main Day/Night to night mode now by highlighting the Main option with our up/down key and press the toggle button again.
